

Agenda for HCV meeting at FSC General Assembly, Kota Kinabalu 2011

TITLE: "PRINCIPLE 9 REVISION AND HIGH CONSERVATION VALUES IN FORESTS AND OTHER ECOSYSTEMS".

PURPOSE OF THE SIDE-EVENT:

- To raise awareness amongst FSC stakeholders of the development of guidance on the interpretation and application of the HCV concept within the FSC Forest Management Standard based on an expert workshop and discussion document led by FSC with support from the HCV Resource Network.
- To illustrate through the use of case studies, how the HCV concept has been applied in different biomes and ecosystems (e.g. boreal, temperate, tropical forests, and non-forest ecosystems such as grasslands), different social contexts, and for different purposes (e.g. natural forest management and plantation planning)
- To provide an opportunity for dialogue between FSC stakeholders and users of the HCV concept outside of forest certification.

LOGISTICS

4:15 – 6:15 Monday 27th June

Proposer: Richard Robertson, FSC; Session Chair: HCV Network co-Chair, Peter Gardiner.

Participation: 30+

Requirements: Projector, Panel discussion table and microphones.

PRE-EVENT: SIGNING OF MOUS BETWEEN FSC AND HCV RN; NKT-I AND HCV RN

AGENDA

Plenary presentation: 15 mins - Tim Synott: "FSC guidelines for Principle 9 and High Conservation Values: Maintaining and enhancing HCVs in certified forests":

- Development of the guidance, key issues e.g. role of P9, identification of values, management of values, guidance for managers and CBs.

15 minutes for discussion/ feedback on technical questions related to draft guidelines

Plenary presentation/ introduction to case studies: 5 mins – HCV Network Manager: "Applying the HCV approach in FSC and beyond: achievements and challenges":

- Global development of HCV; expansion of the concept beyond natural forest management: the challenge of HCV in plantations and agriculture; governance and consistency of the HCV concept (case studies to illustrate specific applications/ challenges)

CASE STUDY TECHNICAL PRESENTATIONS: (10 mins each)

- **HCV in Intact Forest Landscapes:** Christoph Thies, Greenpeace
- **HCV in tropical managed forests:** Tim Rayden, biodiversity assessment and monitoring, WCS Congo Basin
- **HCV challenge for plantations: agriculture** – Aisyah Sileuw (challenges of HCV for environmentally responsible palm oil production;
- **Collaborative HCV management at landscape level** – Petrus Gunarso Tropenbos Indonesia

15 minutes for discussion/ feedback on case studies

Panel discussion/ Q&A (30 mins) Next steps: Proposed approach for rolling out FSC guidelines for FSC users and beyond. Introduction by Anders Lindhe, WWF (5 minutes) and discussion (25 minutes)
